FOREIGN AND INSULAR.

BARBADOS.

Smallpox present.

BARBADOS, WEST INDIES, *July 29, 1902.*

SIR: I have to inform the Department that smallpox has again made its appearance in this island, there being now 15 cases strictly isolated at the quarantine station, located on Pelican Island, separate from the mainland. Should the disease become epidemic I will at once cable the Department. The prevailing opinion among the physicians is that the disease is under control and will not become epidemic. No deaths have been reported by the board of health.

Respectfully, S. A. MACALLISTER,
United States Consul.

The ASSISTANT SECRETARY OF STATE.

BRAZIL.

Reports from Bahia.

BAHIA, BRAZIL, *July 14, 1902.*

SIR: I beg leave to report that for the week ended July 12, 1902, there were reported in Bahia 133 deaths. The following were the causes of death: Aneurism, 1; arterio sclerosis, 8; beriberi, 4; bronchitis, 7; cirrhosis of the liver, 4; diarrhea and dysentery, 4; enteritis, 2; malarial fevers, 6; gastritis, 9; meningitis, 1; senile debility, 4; Bright's disease, 1; nephritis, 3; stillborn, 5; pneumonia, 1; syphilis, 1; tetanus, 1; tuberculosis, 13, and from other causes, 58.

Respectfully, H. W. FURNISS,
United States Consul.

The SECRETARY OF THE TREASURY.

BAHIA, BRAZIL, *July 21, 1902.*

SIR: I beg leave to report that for the week ended July 19, 1902, there were reported 88 deaths in the city of Bahia. The causes of death were the following: Aneurism, 1; arterio-sclerosis, 2; beriberi, 3; bronchitis, 1; cirrhosis of the liver, 4; diarrhea and dysentery, 3; enteritis, 1; malarial fevers, 5; typhoid fever, 2; gastritis, 4; hepatitis, 3; senile debility, 2; Bright's disease, 1; nephritis, 2; stillborn, 6; tetanus, 1; tuberculosis, 10, and from other causes, 37.

Respectfully, H. W. FURNISS,
United States Consul.

The SECRETARY OF THE TREASURY.

BAHIA, BRAZIL, *July 28, 1902.*

SIR: I beg leave to report that for the week ended July 26, 1902, there were reported 100 deaths in Bahia. The causes of death were the

following: Aneurism, 1; arterio-sclerosis, 2; beriberi, 2; bronchitis, 4; cirrhosis of liver, 1; diarrhea, 1; malarial fevers, 5; typhoid, 2; gastritis, 8; hepatitis, 3; meningitis, 2; senile debility, 1; Bright's disease, 1; nephritis, 1; stillborn, 6; pneumonia, 1; peritonitis, 1; tetanus, 2; whooping cough, 1; tuberculosis, 15, and from other causes, 40.

Respectfully, H. W. FURNISS,
United States Consul.

The SECRETARY OF THE TREASURY.

BRITISH HONDURAS.

Weekly report of conditions and transactions at Belize—Fruit port.

BELIZE, BRITISH HONDURAS, *August 3, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended August 3, 1902:

Population according to census of 1901, 9,113; present officially estimated population, about 7,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 5. Causes of death: Appendicitis, 1; phthisis pulmonalis, 1; ichthyosis, 1, and natural causes, 2. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: July 31, steamship *Managua;* crew, 17; passengers from this port, none; passengers in transit, none; baggage disinfected, 5 trunks. August 1, steamship *Breakwater;* crew, 34; passengers from this port, 7; passengers in transit, 16; baggage disinfected, 16 pieces.

Respectfully, R. H. PETERS,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

BRITISH WEST INDIES.

Trinidad quarantines against Barbados.

TRINIDAD, BRITISH WEST INDIES, *July 27, 1902.*

SIR: I beg respectfully to report for the information of the Department of State the prevalence of smallpox at the island of Barbados, and that the Trinidad government have imposed quarantine against the said island. Bills of health are issued at this consulate bearing an indorsement to that effect.

Respectfully, ALVIN SMITH,
United States Consul.

The ASSISTANT SECRETARY OF STATE.

CANADA.

Inspection of immigrants at Quebec for the week ended August 9, 1902.

QUEBEC, CANADA, *August 10, 1902.*

SIR: I have the honor to report that for the week ended Saturday, August 9, 302 immigrants were inspected at this port, as follows: Number passed, 293; detained, 9. * * *

Respectfully, W. C. BILLINGS,
Assistant Surgeon.

The SURGEON-GENERAL.

CANARY ISLANDS.

Case of plague on the steamship Duca di Galliera at Barcelona; also on the steamship Espagne at Marseille.

[No. 186.]

TENERIFFE, CANARY ISLANDS, *July 16, 1902.*

SIR: I have the honor to report that the Italian steamship *Duca di Galliera*, from Buenos Ayers, put in at Grand Canary, where she took coal, landed and took passengers. When she arrived at Barcelona plague was discovered on board and she was ordered in quarantine.

The French steamship *Espagne*, also from Buenos Ayres, stopped at this port for coal, and on her arrival at Marseille bubonic plague was discovered on board and she was sent to quarantine quarters. The above 2 cases have given the inhabitants of these islands a quiet scare, on account of the quarantine regulations, which I reported in my dispatch, No. 172, dated April 22, 1902, having not been strictly enforced.

Respectfully, SOLOMON BERLINER,
United States Consul.

The ASSISTANT SECRETARY OF STATE.

CHINA.

Reports from Hongkong—Plague and cholera diminishing in Hongkong, but prevalent in the north.

HONGKONG, CHINA, *July 1, 1902.*

SIR: I have the honor to transmit herewith the abstract of bills of health issued at this station during the week ended June 28, 1902. Eleven vessels were inspected, 444 individuals were bathed at the disinfecting station, and 489 bundles of clothing and bedding were disinfected by steam. The cholera situation in this city continues to show great improvement, but 2 cases and 2 deaths having been reported during the week. This makes a total of 362 cases and 318 deaths from this disease thus far this year. Unofficial reports from the Canton district indicate that the disease is subsiding. Reports from the coast cities in the north of China indicate that the disease is especially severe. The local papers state that the foreign population of Shanghai has suffered to a considerable extent.

I respectfully inclose a letter from Dr. Anna K. Scott, of the Baptist mission at Swatow, which describes the conditions in that district.

There was a slight improvement in the plague situation in this city during the week, 44 cases and 42 deaths having been reported. This makes a total of 373 cases and 364 deaths thus far this year. One case of enteric fever and 1 case of smallpox, the latter terminating fatally, were also reported to the sanitary board.

Respectfully, JOHN W. KERR,
Assistant Surgeon.

The SURGEON-GENERAL.

[Inclosure.]

SWATOW, CHINA, *June 15, 1902.*

SIR: In compliance with your request for information concerning the prevalence of Asiatic cholera in the Swatow district, I have now to report that the disease has been

on a steady increase during the past month. Most of our cities have been visited by the epidemic, there being many cases and the disease taking a rapid and fatal course.

At the present writing there is a marked improvement in the cities, but the villages in all directions are suffering severely—the epidemic spreading far and wide. In the port of Swatow there is now but little of either plague or cholera.

Respectfully,

ANNA K. SCOTT, M. D.,
American Baptist Mission, Swatow.

JOHN W. KEER,
Assistant Surgeon, Hongkong, China.

June 25, 1902.

Since writing my letter of the 15th instant there has been a fresh outbreak of cholera in Swatow. Yesterday Mr. Mathieson Brown, of Messrs. Butterfield & Swire, succumbed to the disease after an illness of twelve hours. I am informed that many of the Chinese are dying of it within the past four days.

A. K. SCOTT.

HONGKONG, CHINA, *July 7, 1902.*

SIR: I have the honor to transmit herewith the abstract of bills of health issued at this station during the week ended July 5: Thirteen vessels were inspected, 806 individuals were bathed at the disinfecting station, and 1,043 pieces of baggage were disinfected by steam. There were 9 rejections during the week because of fever. One of the bills of health was issued to the British steamship *Australasia* July 3, after disinfection of the crew and their living apartments. This vessel had a case of cholera develop among the crew while in this port, which was removed to the infectious-disease hospital June 5, 1902.

A few cases of cholera continue to occur in the colony, 9 cases and 6 deaths having been reported during the week. Of the total cases reported, 4 were Chinese, 3 were Japanese, 1 an European, and 1 an Indian.

Information received from Shanghai and Hankow during the week indicate that those ports are being visited by severe epidemics, and that the disease has spread to the surrounding villages and country. The Japanese steamship *America Maru*, of the San Francisco lines, was quarantined here July 3 because of a case of cholera which developed in the steerage after leaving Shanghai.

Thirty-two cases of plague and 31 deaths and 1 case of smallpox and 1 death were also reported during the week. One of the plague cases was landed from the P. and O. steamship *Valetta*, carrying the outward English mail. During the past two days 2 other cases have been removed to Kennedy Town hospital suffering with plague, and other cases are under observation. I am informed that many cases of illness developed after the ship left Singapore and that on arrival here many dead rats were found in the vessel. This vessel had lain in Bombay for some months prior to this voyage.

Respectfully,

JOHN W. KERR,
Assistant Surgeon.

The SURGEON-GENERAL.

Cholera at Niuchwang.

[No. 129.]

NIUCHWANG, CHINA, *June 26, 1902.*

SIR: I have to confirm my telegram of this day:

SECRETARY OF STATE, *Washington, D. C.:* Cholera.—MILLER.

The first appearance of cholera was on June 6, brought into port by a British steamship that brought 1,500 coolies here from Taku. Every

effort was made to suppress it and as many as could be secured of these coolies were put in detention; but the disease broke out in 70 places and up to date 500 cases have been reported and 340 have died.

Respectfully, HENRY B. MILLER,
United States Consul.

The ASSISTANT SECRETARY OF STATE.

COLOMBIA.

Weekly report of conditions and transactions at Bocas del Toro—Fruit port.

BOCAS DEL TORO, COLOMBIA, *August 5, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended August 4, 1902:

Population according to census, not obtainable. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 5. Prevailing diseases, malaria and some dysentery. Deaths and causes are as follows: One adult, female, consumption; 1 adult, female, dysentery; 1 child, female, malarial fever; 1 adult, male, American, white (Rev. F. J. Hutchins), dysentery; and 1 adult, Chinaman, chronic malaria. General sanitary condition of this port and the surrounding country during the week, good. Quite cool weather and heavy rains have no doubt helped the sanitary condition here.

Bills of health were issued to the following vessels: July 30, steamship *Colombia*; crew, 18; passengers from this port, none; passengers in transit, none; baggage disinfected, none. August 2, steamship *Mount Vernon;* crew, 20; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully, PAUL OSTERHOUT,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

COSTA RICA.

Weekly report of conditions and transactions at Port Limon—Fruit port.

PORT LIMON, COSTA RICA, *August 7, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended August 7, 1902:

Present officially estimated population, 4,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 5. Prevailing disease, malarial fever. General sanitary condition of this port and the surrounding country during the week has been good. The 5 deaths noted above occurred in this port—1 white, male, Salvadorean, and 4 colored, males, 1 an infant, due to, respectively, influenza, chronic malarial fever, lumbricoides, a sudden death, cause unknown, and pleurisy with complications.

Bills of health were issued to the following vessels: July 31, steamship *Holstein;* crew, 23; passengers from this port, none; passengers in transit, none; baggage disinfected, none. August 2, steamship *Venus;* crew, 28; passengers from this port, none; passengers in transit, none; baggage disinfected, none; steamship *Foxhall;* crew, 26; passengers from this port, none; passengers in transit, none; baggage disinfected, none. August 4, steamship *Athos;* crew, 41; passengers from this port, 6; passengers in transit, 3; baggage disinfected, none. August 4, steamship *Olympia;* crew, 37; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

WM. H. CARSON,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

CUBA.

Reports from Cienfuegos.

CIENFUEGOS, CUBA, *August 4, 1902.*

SIR: Through Surg. A. H. Glennan, Havana, Cuba, I have the honor to transmit report of transactions at this station for week ended August 2. Eleven deaths occurred during this week, 5 due to malaria, 2 due to capillary bronchitis, 1 due to tuberculosis, others from ordinary causes. Death rate 14.34 per 1,000 per annum. Nothing of importance to report from substations. Sanitary condition of the city is good.

Respectfully,

G. M. GUITÉRAS,
Passed Assistant Surgeon.

The SURGEON-GENERAL.

CIENFUEGOS, CUBA, *August 11, 1902.*

SIR: Through Surg. A. H. Glennan, I have the honor to report transactions at this station for the week ended August 9 to be the following: Ten deaths occurred in this city during the week, 3 due to tuberculosis, 1 due to broncho-pneumonia, and others to ordinary causes. Death rate for week, 13.04 per 1,000 per annum. Two bills of health were issued to vessels clearing for the United States—one of these, steamship *Hiso*, cleared for Mobile, was fumigated by the Cuban quarantine officers under my supervision before departure. Nothing of importance to report from substations.

Respectfully,

R. L. MCMAHAN,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Report from Matanzas.

MATANZAS, CUBA, *August 11, 1902.*

SIR: Through Surg. A. H. Glennan, Havana, Cuba, I have the honor to submit the following report of the transactions at this port for the week ended August 9, 1902: Vessels, outgoing, inspected and cleared, 6; crew inspected, 170; passengers inspected, 6; vessels disinfected, 1. No quarantinable disease was reported in this district. Mortality report for this port is inclosed.

Respectfully,

R. H. VON EZDORF,
Assistant Surgeon.

The SURGEON-GENERAL.

[Inclosure.]

Mortality report for week ended August 9, 1902, for Matanzas, Cuba.

Tuberculosis	2
Pneumonia	1
Meningo-encephalitis	1
Gastro-enteritis	1
Entero-sepsis	1
Infantile colic	1
Eclampsia	1
Uræmia	1
Heart disease	1
Arterio-sclerosis	1
Chronic rheumatism	1
Total	12

Annual rate of mortality for week, 12.83 per 1,000.

Reports from Nuevitas, Gibara, Puerto Padre, Baracoa, and Banes.

NUEVITAS, CUBA, *August 7, 1902.*

SIR: Through Surg. A. H. Glennan, Havana, Cuba, I have the honor to submit the following report of this station for the two weeks ended August 2, 1902: During this period 6 bills of health were issued to vessels clearing for ports in the United States. Two pieces of baggage were disinfected and 34 pieces inspected and passed. There were inspected 89 passengers and 174 in crews. The sanitary condition of this port is good. No quarantinable disease has been reported at any port in this district. The mortuary reports for the week ended July 26, 1902, is as follows:

Nuevitas.—Pulmonary consumption, 1; carcinoma of uterus, 1; cholera infantum, 1; urinary infiltration, 1; pernicious malarial fever, 1; cirrhosis of the liver, 1; Total, 6.

Puerto Padre.—Cirrhosis of the liver, 1; acute alcoholism, 1. Total, 2.

Gibara.—Meningitis, 1; tetanus infantum, 2. Total, 3.

Baracoa.—Acute enteritis, 1; alcoholism, 1; pulmonary consumption, 3. Total, 5.

Banes.—No report.

The mortuary report for the week ended August 2, 1902, has not been received.

Respectfully,

E. F. MCCONNELL,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Report from Santiago de Cuba.

SANTIAGO DE CUBA, *August 6, 1902.*

SIR: I have the honor to transmit herewith the mortality statistics for the week ended August 2, 1902. The weekly abstract of bills of health issued goes under a separate cover.

Respectfully,

RICHARD WILSON,
Acting Assistant Surgeon.

Surg. A. H. GLENNAN.

Mortality statistics for the week ended August 2, 1902.

Typhoid fever	1
Intermittent fever and malarial cachexia	4
Tubercle of lungs	2

Total	16

Annual rate of mortality for the week 19.34 per 1,000. Estimated population, 43,000.

DANISH WEST INDIES.

Quarantine against Philadelphia and Cartagena raised.

WASHINGTON, D. C., *August 12, 1902.*

SIR: I have the honor to inform you that on the 29th ultimo, the minister at Copenhagen wrote that the government of the Danish West Indies raised the quarantines against Philadelphia and Cartagena, which were declared in January last.

Respectfully,

ALVEY A. ADEE,
Acting Secretary.

The SECRETARY OF THE TREASURY.

EGYPT.

Cholera in Alexandria and Cairo and the provinces of Assiout, Charkieh, and Minieh.

CAIRO, EGYPT, *August 19, 1902.*

SECRETARY OF STATE, *Washington, D. C.:* No cholera at Port Said or Suez; 2 cases at Alexandria; 3 new cases at Cairo; Assiout Province most seriously affected—27 cases yesterday; Minieh, 43; Charkieh, 19.—SMITH.

CAIRO, EGYPT, *August 19, 1902.*

SECRETARY OF STATE, *Washington, D. C.:* Aboukowkourkas, Minieh Province, 78 cases cholera and 38 deaths.—SMITH.

ENGLAND.

Report from Liverpool.

LIVERPOOL, ENGLAND, *August 5, 1902.*

SIR: I have the honor to state that for the week ended August 2, 1902, there were reported to the local health authorities the following diseases: Smallpox, 4; typhus fever, 2; enteric fever, 17; scarlet fever, 66; diphtheria, 14, and measles, 16. The report from Birkenhead has not arrived, so I will include it in next week's report. There have been no new cases of smallpox in Bootle since my report of July 22, 1902.

Respectfully,

CARROLL FOX,
Assistant Surgeon.

The SURGEON-GENERAL.

Report from London.

LONDON, ENGLAND, *July 31, 1902.*

SIR: I have the honor to report that for the week ended July 26, 1902, there were inspected and given bills of health at this port 5 vessels, and 27 members of the crew and cattlemen were vaccinated.

There were 7 deaths from smallpox in England, 20 less than last week, and 4 of these belonged to London. The admissions during the week were 23 cases, against 58, 51, and 48 for the three preceding weeks. According to the returns from the hospital for infectious diseases, there were 369 cases of smallpox, 2,486 of scarlet fever, 988 of diphtheria, and 305 of enteric fever under treatment at the close of the week. There were 459 cases of smallpox under treatment at the close of the preceding week.

According to recent dispatches relative to cholera in Egypt, there occurred 41 fresh cases of this disease in Cairo—with 35 deaths—on the 29th instant, 72 fresh cases and 14 deaths at Moucha, and 1 case at Gizeh.

Respectfully,

JOHN MCMULLEN,
Passed Assistant Surgeon.

The SURGEON-GENERAL.

GERMANY.

Report from Berlin—Health of the city.

BERLIN, GERMANY, *August 4, 1902.*

SIR: I have the honor to inform you that for three years the mortality rate in Berlin has not been so low as it was for the week ended July 19 this year, amounting to only 12.8 per 1,000—that is to say, but two-thirds of that of the corresponding week of last year. London, Paris, Vienna, and most of the large German cities had higher death rates during the week in question; of 33 of the latter towns, only Altona, Elberfeld, Crefeld, Schöeneberg (12.7), and Charlottenburg (9.3) showed more favorable statistics than Berlin. Acute diseases of the intestines were of less frequent occurrence than during the foregoing six weeks, and caused 57 deaths. No important change occurred in the number of cases of acute diseases of the respiratory organs, which caused 33 deaths. Consumption claimed 66 victims. Eleven deaths resulted from measles and 4 from scarlet fever. A decrease was noticeable in the number of cases of diphtheria, 2 ending in death. Five persons died by violence, as compared with 20 during the foregoing week.

Respectfully,

FRANK H. MASON,
United States Consul.

The SURGEON-GENERAL.

Plague and cholera in various countries.

BERLIN, GERMANY, *August 1, 1902.*

SIR: I have the honor to transmit the latest information regarding plague and cholera obtained from the imperial health office (Kaiserliches-Gesundheitsamt), Berlin.

Plague.

RUSSIA.—In Odessa, up to July 26, 4 plague cases have been registered.

EGYPT.—During the period from July 11 to July 17, 17 cases of plague and 7 deaths were recorded, namely, 12 cases and 4 deaths in Alexandria, 1 case and 1 death in Tukh, and 4 cases and 2 deaths in Damanhur.

CHINA—*Hongkong.*—During the period from June 1 to June 14, 92 plague cases and 91 deaths were recorded.

QUEENSLAND.—According to the official bulletin there were recorded in Brisbane, during the week ended May 31, 4 plague cases and 1 death. Between June 1 and June 7 no fresh cases occurred.

Plague and cholera.

BRITISH INDIA.—In Calcutta, during the week from June 15 to June 21, 56 persons died of plague and 31 of cholera.

Cholera.

EGYPT.—According to a communication of July 19, 96 cholera cases and 80 deaths have been reported in the village of Moucha.

CHINA—*Hongkong.*—During the period from June 1 to June 14, 21 cholera cases with 18 deaths were recorded.

DUTCH INDIA.—In the district of Soerabaya there were recorded during the period from June 1 to June 14, 148 cases of cholera and 79 deaths.

Respectfully,

FRANK H. MASON,
United States Consul-General.

The SURGEON-GENERAL.

GUATEMALA.

Weekly report of conditions and transactions at Livingston—Fruit port.

LIVINGSTON, GUATEMALA, *August 5, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended August 5, 1902:

Present officially estimated population, 3,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, none. Prevailing disease, malarial fever. General sanitary condition of this port and the surrounding country during the week, good.

Bill of health was issued to the following vessel: August 5, steamship *Geo. W. Kelley;* crew, 18; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

GUY A. DARCANTEL,
For A. J. SMITH,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Report from Puerto Barrios—Fruit port.

PUERTO BARRIOS, GUATEMALA, *August 4, 1902.*

SIR: The sanitary condition of this port and the surrounding country during the week ended August 2, has been good. The following vessels have cleared: July 29, American steamship *Breakwater*, for New Orleans, with 3 passengers and 6 pieces of disinfected baggage. July 30, Norwegian steamship *Managua*, for Mobile, with cargo of fruit.

Respectfully, D. P. ALBERS,
Resident Medical Inspector for the Louisiana State Board of Health, Puerto Barrios.

The SURGEON-GENERAL.

HONDURAS.

Weekly report of conditions and transactions at La Ceiba—Fruit port.

LA CEIBA, HONDURAS, *August 2, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended August 2, 1902:

Present officially estimated population, about 4,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 2. Prevailing disease, malaria. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: July 28, American steamship *David;* crew, 24; passengers from this port, none; passengers in transit, none; baggage disinfected, none. July 31, British steamship *Usk;* crew, 20; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully, W. B. ROBERTSON,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Weekly report of conditions and transactions at Puerto Cortez—Fruit port.

PUERTO CORTEZ, HONDURAS, *August 7, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended August 7, 1902:

Population according to census of 1896, 1,856; present officially estimated population, 2,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, none. Prevailing disease, malarial fever. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: July 31, steamship *Breakwater;* crew, 34; passengers from this port, 9; passengers in

transit, 7; baggage disinfected, 15 pieces. August 1, steamship *España*, crew, 14; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

S. H. BACKUS,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

ITALY.

Report from Naples—Cholera and plague in Egypt—Plague in Odessa.

NAPLES, ITALY, *August 4, 1902.*

SIR: I have the honor to report that for the week ended August 2, 1902, the following ships were inspected:

July 28, the steamship *Cambroman*, of the Dominion Line, bound with passengers and cargo for Boston. There were inspected and passed 489 steerage passengers and 154 pieces of large baggage; 750 pieces of baggage were disinfected by steam. The rejection of 29 steerage passengers was advised.

July 30, the steamship *Nord America*, of the Veloce Line, bound with passengers and cargo for New York. There were inspected and passed 459 steerage passengers and 65 pieces of large baggage; 350 pieces of baggage were disinfected by steam. The rejection of 38 passengers was advised.

July 31, the steamship *Hohenzollern*, of the North German Lloyd Steamship Company, bound with passengers and cargo for New York. There were inspected and passed 218 steerage passengers and 65 pieces of large baggage; 350 pieces of baggage were disinfected by steam. The rejection of 23 steerage passengers was advised.

Asiatic cholera in Egypt.

Reports from Egypt state that, July 27, there were 38 deaths from Asiatic cholera in Cairo and 35 new cases, and in Moucha 21 deaths and 10 new cases. All the cases at Moucha, which is in the Assiut province, are being isolated at a place 10 kilometers south of Assiut. The surface wells of Moucha, which are the source of water supply, have been placed under military surveillance. All infected wells have been closed. July 28, there were 37 fresh cases of cholera and 27 deaths at Cairo. At Moucha there were 19 new cases and 25 deaths. One case was reported from Gizeh. July 29 there were 41 fresh cases at Cairo, and July 30, 29 new cases.

Bubonic plague in Egypt.

July 26, the total number of cases of bubonic plague throughout Egypt was 19. At Alexandria, there were 16 cases; at Tukh, 1 case, and 2 at Damanhur. From reports dated July 26, it was shown that since April 7, 1902, the beginning of the second year of the epidemic, there had been 152 deaths and 117 recoveries from plague in Egypt.

Bubonic plague at Odessa.

In the latter part of July there were 3 additional cases of plague at Odessa, making in all 5 cases and no deaths in July. Hundreds of rats are being burnt daily.

Respectfully,

J. M. EAGER,
Passed Assistant Surgeon.

The SURGEON-GENERAL.

JAPAN.

Reports from Yokohama—Cholera at Tokyo, Fukuoka Ken, and Kobe.

YOKOHAMA, JAPAN, *July 15, 1902.*

SIR: I have the honor to transmit herewith abstract of bills of health for the week ended July 12, 1902. Two vessels were inspected with a total personnel of 182 crew and 100 passengers.

During the past week the local newspapers reported a death from cholera in Yokohama, which report, however, was later denied; the official statement for the week ended July 12 shows this city to be free from quarantinable disease. A death from cholera occurred in Tokyo on the 9th instant. The disease in that city seems to be, for the time, under control.

Fukuoka Ken, a prefecture in the island of Kyushu, has furnished the bulk of the new cases of cholera reported in Japan during the past week, its total up to July 10 being 74 cases with 44 deaths in addition to 27 cases with 12 deaths resulting from the outbreak in Fukuoka prison, and 43 cases now regarded as merely doubtful or suspicious. A considerable number of the emigrants now passing from Japan to Hawaii at the rate of more than a 1,000 monthly, come from the above-mentioned prefecture, and it has seemed proper to hold them under observation for five days at this port before shipping. At a conference with leading Japanese sanitary officials, brought about through the courtesy of United States Minister Buck, the propriety of administering prophylactic inoculation to emigrants for the United States from cholera-infected districts, was suggested. I mention this fact as illustrative of the confidence with which the anticholera vaccine is regarded in Japan.

Three of the cases reported from Fukuoka Ken (all fatal) are credited to Moji, a considerable shipping town. Cholera exists at Kobe.

Respectfully, DUNLOP MOORE,
Assistant Surgeon.

The SURGEON-GENERAL.

YOKOHAMA, JAPAN, *July 22, 1902.*

SIR: I have the honor to transmit herewith abstract of bills of health issued at this office during the week ended July 19, 1902. There were inspected 4 vessels, with a total personnel of 307 crew and 887 passengers; 502 steerage passengers and 22 crew were bathed and 525 pieces of baggage were disinfected by formaldehyd. Fortunately, though many of the most important Japanese seaports are now infected by cholera, Yokohama is officially declared free from quarantinable disease. The newspapers recently announced a case of cholera as occurring in Kanagawa Ken, the prefecture in which Yokohama is situated, but this report has not been officially confirmed to me.

Respectfully, DUNLOP MOORE,
Assistant Surgeon.

The SURGEON-GENERAL.

Cholera at Okayama.

DEPARTMENT OF STATE,
Washington, D. C., August 9, 1902.

SIR: I have the honor to advise you for the information of the Public Health and Marine-Hospital Service, that the Department is in receipt

of a telegram from the consul of the United States at Kobe, Japan, reading, "Cholera, Okayama."

Respectfully,

ALVEY A. ADEE,
Acting Secretary of State.

The SECRETARY OF THE TREASURY.

MEXICO.

Report from Progreso—Yellow fever.

PROGRESO, MEXICO, *August 9, 1902.*

SIR: Pending the arrival of my instructions, I have the honor to report 4 cases of yellow fever with 3 deaths, from July 15, 1902, to August 9, 1902. In 2 of the fatal cases there was a history of exposure in Vera Cruz, and in the other the person had been residing here for a year. There is 1 case remaining.

Respectfully,

EDWARD T. HARGRAVE,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Report from Vera Cruz.

VERA CRUZ, MEXICO, *August 19, 1902.*

SIR: I have the honor to make the following report for the week ended August 9: From yellow fever 19 cases and 11 deaths were reported, 10 deaths from tuberculosis, and a total of 50 deaths from all causes. No sickness has appeared among the shipping, and no suspects have been found among the passengers leaving the port.

Respectfully,

S. H. HODGSON,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

NICARAGUA.

Weekly report of conditions and transactions at Bluefields—Fruit port.

BLUEFIELDS, NICARAGUA, *August 5, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended August 2, 1902:

Present officially estimated population, 4,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 1. Prevailing disease, malarial fever, of a mild type. General sanitary condition of this port and the surrounding country during the week, very good.

Bills of health were issued to the following vessels: July 27, steamship *Nicaragua;* crew, 20; passengers from this port, none; passengers in transit, none; baggage disinfected, none. August 2, steamship *Utstein;* crew, 15; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

D. W. GOODMAN,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

RUSSIA.

No new cases of plague at Odessa.

ODESSA, RUSSIA, *July 16, 1902.*

SIR: I have the honor to report to the Department that since my No. 706, of the 10th instant, there have been no new cases of plague, and as far as I have been able to ascertain, no deaths from plague. The authorities have made no official or other announcement concerning the 2 cases mentioned in my dispatch No. 706. I issued a bill of health this day for the German steamship *Seriphos*, bound for New York via Black Sea ports, and I made no mention of the plague because during the past two weeks there have been no new cases.

Respectfully, THOS. E. HEENAN,
United States Consul.

The ASSISTANT SECRETARY OF STATE.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

AUSTRALIA—*New South Wales—Newcastle.*—Month of June, 1902. Estimated population, 48,900. Total number of deaths, 62, including diphtheria, 1; enteric fever, 2; measles, 7, and 1 from whooping cough.

Queensland—Brisbane.—Month of April, 1902. Estimated population, 119,907. Total number of deaths, 112, including diphtheria, 1; enteric fever, 2, and 8 from plague.

Month of May, 1902. Total number of deaths, 80, including enteric fever, 2, and 9 from plague.

BAHAMAS—*Dunmore Town.*—Two weeks ended August 1, 1902. Estimated population, 1,232. One death. No contagious diseases.

Governors Harbor.—Two weeks ended August 2, 1902. Estimated population, 1,500. No deaths and no contagious diseases.

Green Turtle Cay—Abaco.—Two weeks ended July 29, 1902. Estimated population, 3,314. No deaths and no contagious diseases.

Inagua.—Three weeks ended July 31, 1902. Estimated population, 1,800. No deaths and no contagious diseases.

Nassau.—Two weeks ended August 2, 1902. Estimated population, 12,535. Number of deaths not reported. No contagious diseases reported.

BRAZIL—*Ceara.*—Month of May, 1902. Estimated population, 50,000. Total number of deaths, 100, including 12 from enteric fever.

Month of June, 1902. Total number of deaths, 72, including 8 from enteric fever.

CANADA—*British Columbia—Vancouver.*—Month of July, 1902. Estimated population, 29,000. Total number of deaths not reported. One death from diphtheria reported.

Victoria.—Estimated population, 21,000. Total number of deaths, 23, including 1 from tuberculosis.

Quebec—Sherbrooke.—Month of July, 1902. Estimated population, 12,000. Total number of deaths, 20. No contagious diseases reported.

CHILE—*Antofagasta.*—Month of June, 1902. Estimated population, 8,000. Total number of deaths, 57, including 5 from tuberculosis.

CHINA—*Amoy.*—Two weeks ended July 12, 1902. Estimated population, 250,000. Total number of deaths not reported. Cholera present.

FRANCE—*St. Etienne.*—Two weeks ended July 15, 1902. Estimated population, 146,559. Total number of deaths, 125, including diphtheria, 4; enteric fever, 1; measles, 1; scarlet fever, 1; whooping cough, 1, and 12 from tuberculosis.

GIBRALTAR.—Three weeks ended July 27, 1902. Estimated population, 27,460. Total number of deaths, 13. No deaths from contagious diseases.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 76 great towns in England and Wales during the week ended July 26, 1902, correspond to an annual rate of 13.9 per 1,000 of the aggregate population, which is estimated at 14,862,456.

Bradford.—Two weeks ended July 26, 1902. Estimated population, 281,770. Total number of deaths, 162, including diphtheria, 4; measles, 4; scarlet fever, 3, and 20 from tuberculosis.

London.—One thousand two hundred and sixty deaths were registered during the week, including measles, 32; scarlet fever, 8; diphtheria, 31; whooping cough, 49; enteric fever, 19; smallpox, 4, and diarrhea and dysentery, 47. The deaths from all causes correspond to an annual rate of 14.3 per 1,000. In Greater London 1,656 deaths were registered. In the "outer ring" the deaths included 6 from diphtheria, 2 from measles, 2 from smallpox, and 7 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended July 26, 1902, in the 21 principal town districts of Ireland was 17.3 per 1,000 of the population, which is estimated at 1,092,322. The lowest rate was recorded in Dundalk and Porta Down, viz, 0.0, and the highest in Galway, viz, 31.1 per 1,000. In Dublin and suburbs 150 deaths were registered, including diphtheria, 1; enteric fever, 1; measles, 8; scarlet fever, 1; whooping cough, 1, and 22 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended July 26, 1902, correspond to an annual rate of 15.8 per 1,000 of the population, which is estimated at 1,679,923. The lowest mortality was recorded in Paisley, viz, 8.3, and the highest in Glasgow, viz, 18.1 per 1,000. The aggregate number of deaths registered from all causes was 512, including diphtheria, 4; measles, 10; scarlet fever, 6, and 13 from whooping cough.

JAMAICA—*Kingston.*—Month of July, 1902. Estimated population, 46,543. Total number of deaths, 147, including 12 from phthisis pulmonalis.

Port Antonio.—Weeks ended July 19 and August 2, 1902. Estimated population not reported. No deaths and no contagious diseases.

JAPAN—*Nagasaki.*—Ten days ended July 10, 1902. Estimated population, 131,700. Total number of deaths not reported. One death from diphtheria, and 3 from enteric fever reported.

KOREA—*Seoul.*—Weeks ended June 14 and June 28, 1902. Estimated population, 300,000. Number of deaths not reported. Smallpox, typhus fever, and cholera present.

NORFOLK ISLAND.—Month of May, 1902. Estimated population, 906. No deaths and no contagious diseases.

Cholera, yellow fever, plague, and smallpox, June 28, 1902, to August 22, 1902.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from United States consuls through the Department of State and other sources.]

[For reports received from December 28, 1901, to June 27, 1902, see PUBLIC HEALTH REPORTS for June 27, 1902.]
